$$A_i \sim \text{Bern}\left(\frac{1}{1 + \exp(-\psi_i)}\right)$$

$$\psi_i = U D_i U$$

$$D_i = \text{diag}(d_{i1}, d_{i2}, d_{i3})$$

$$\text{vec}(U) \sim N(\text{vec}(X), \sigma^2)$$

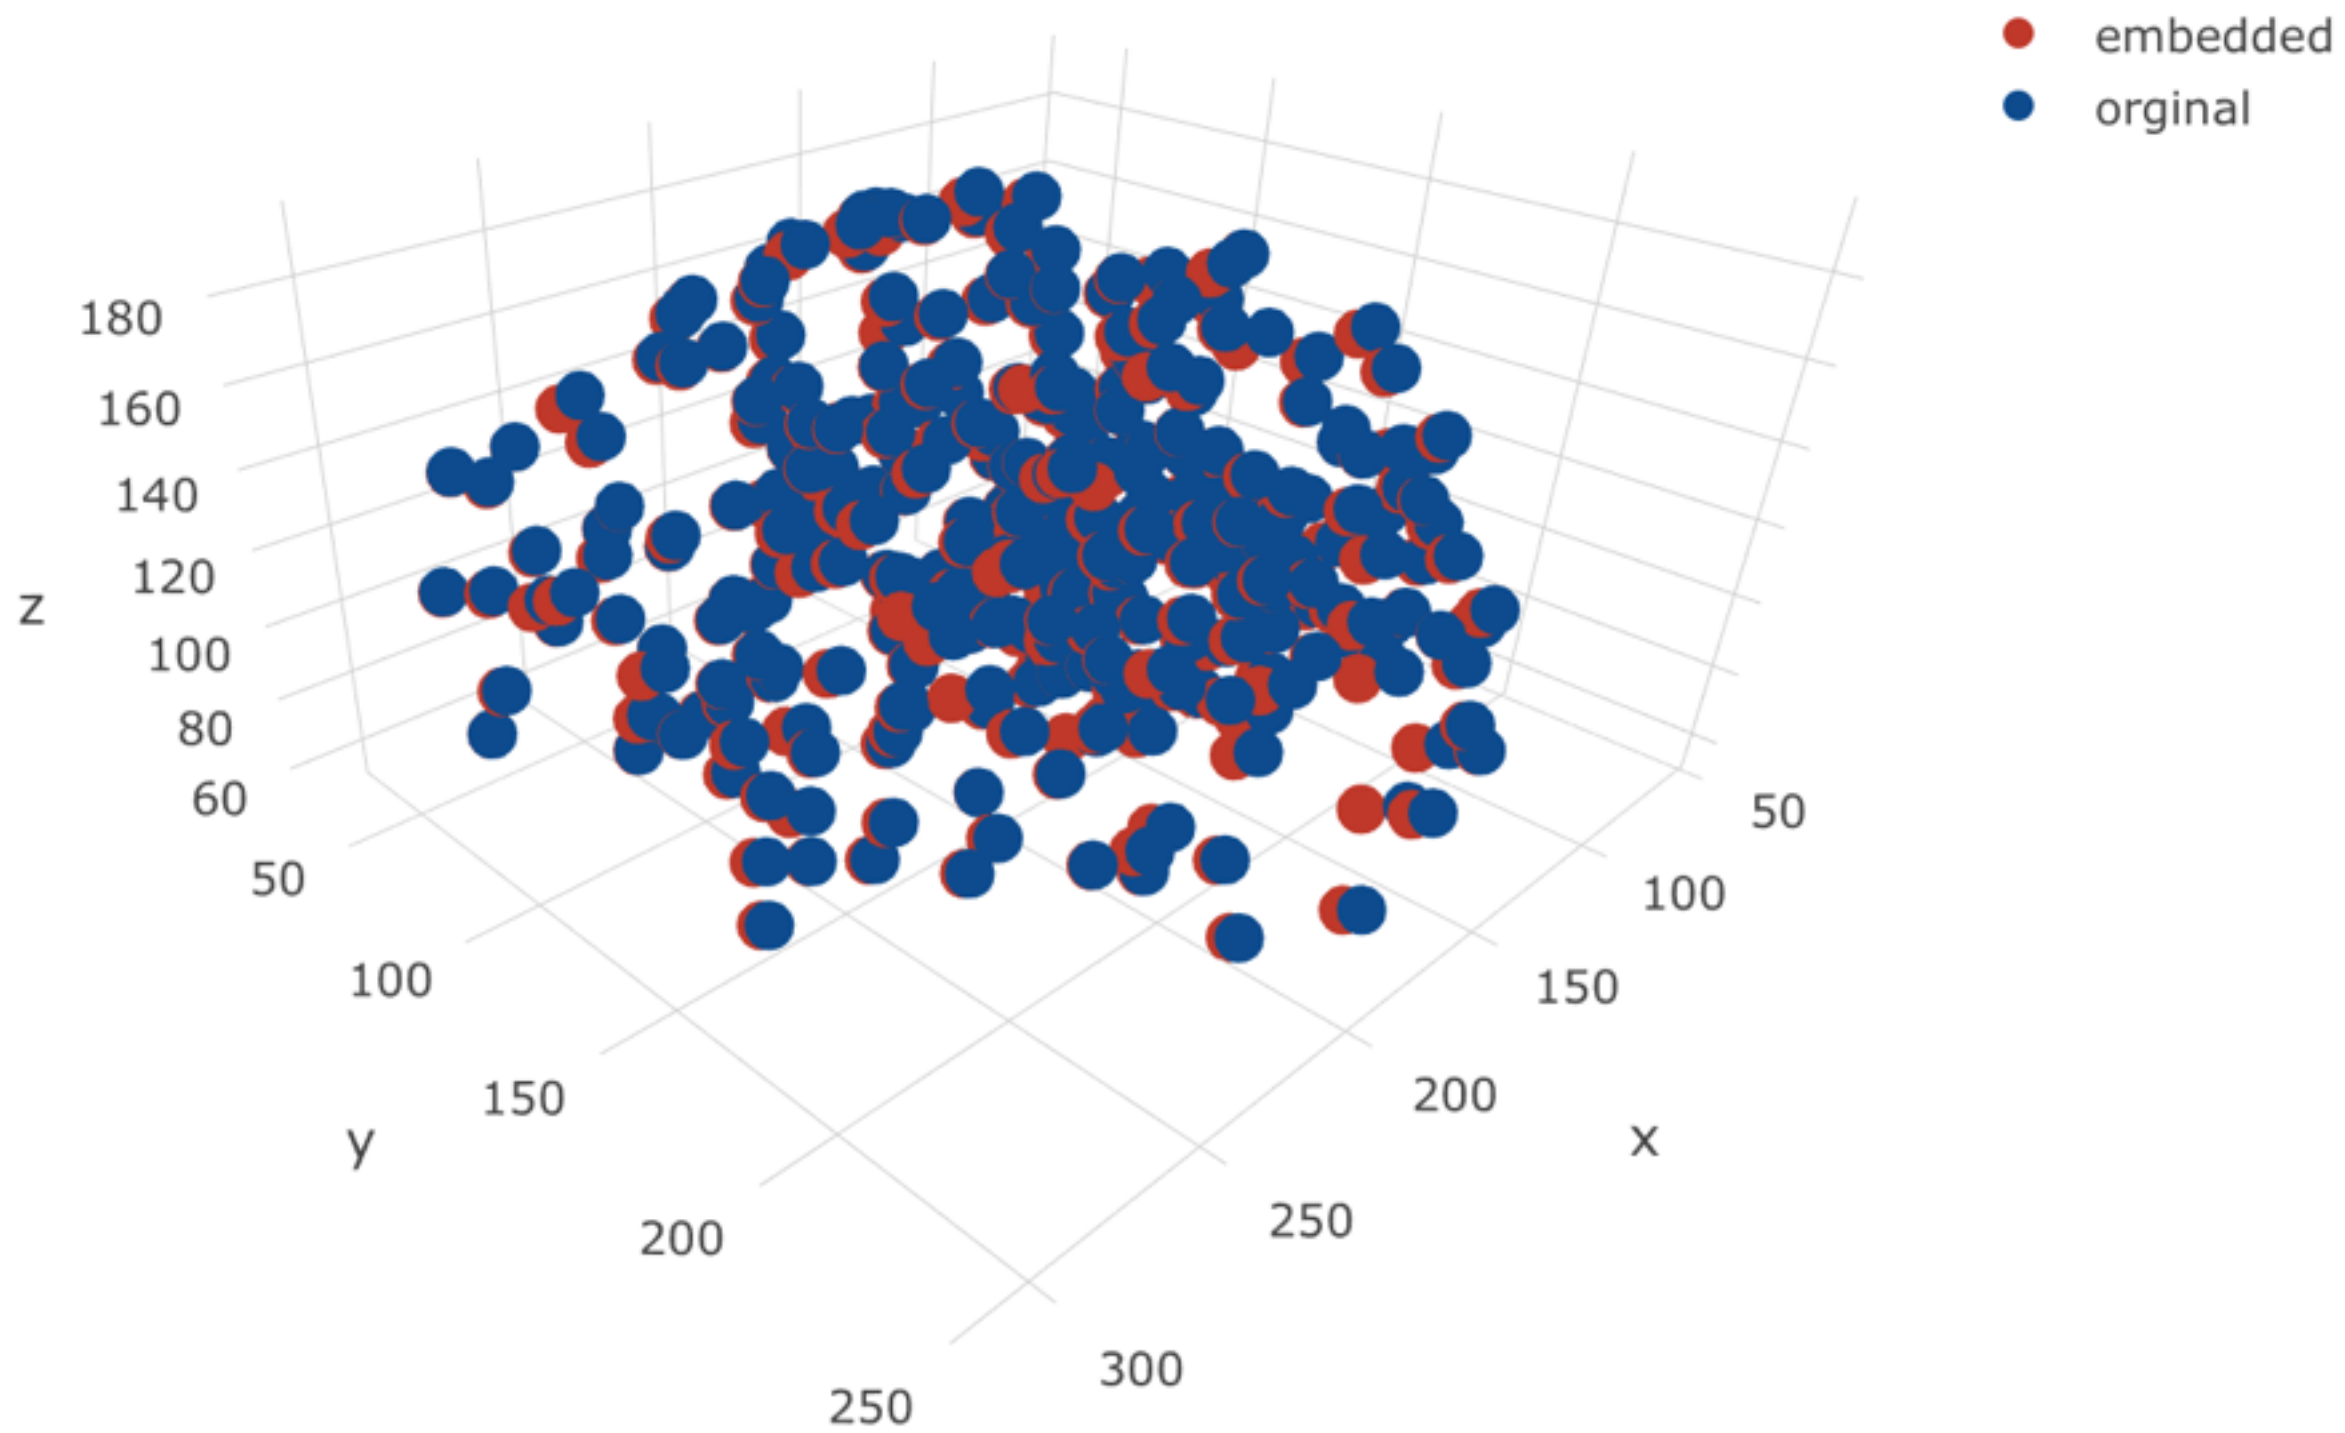

A: adjacency matrix

X: spatial coordinate matrix

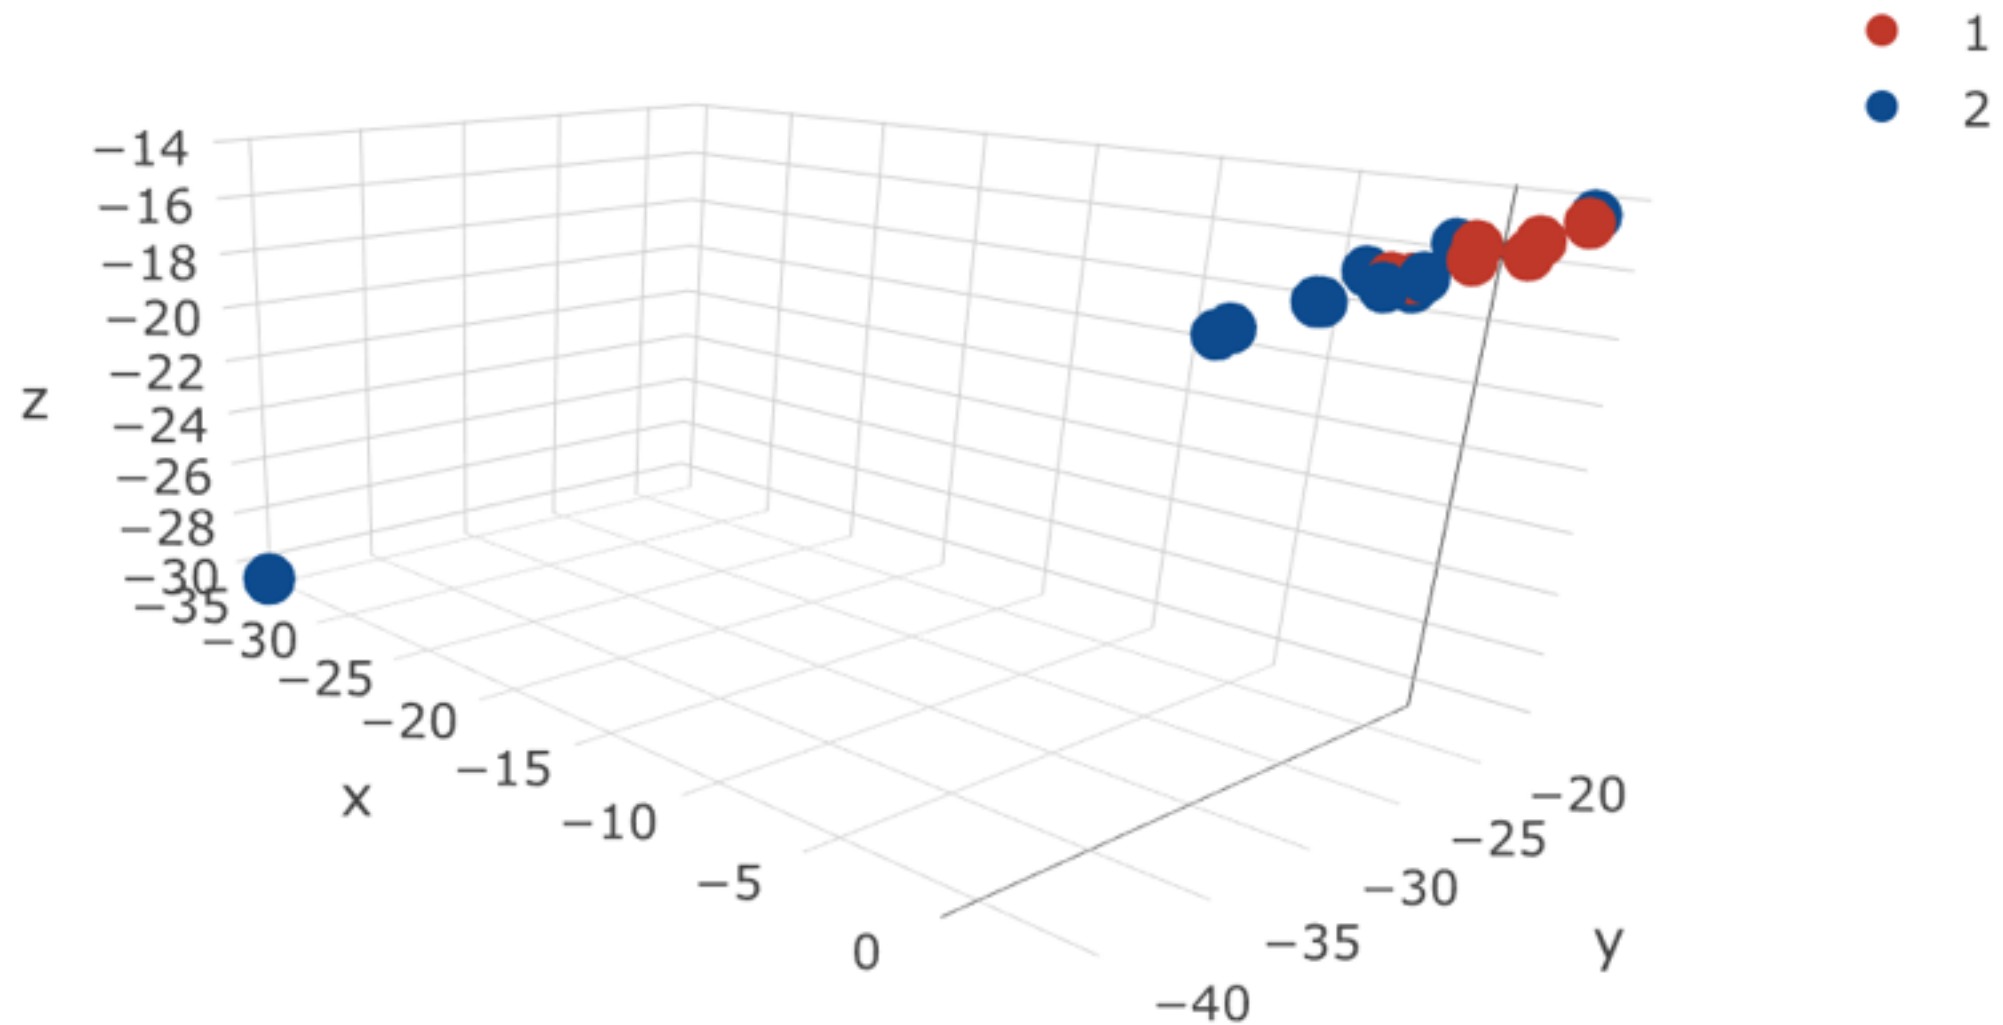

U: shared latent factors

D_i: individual loadings

U vs X

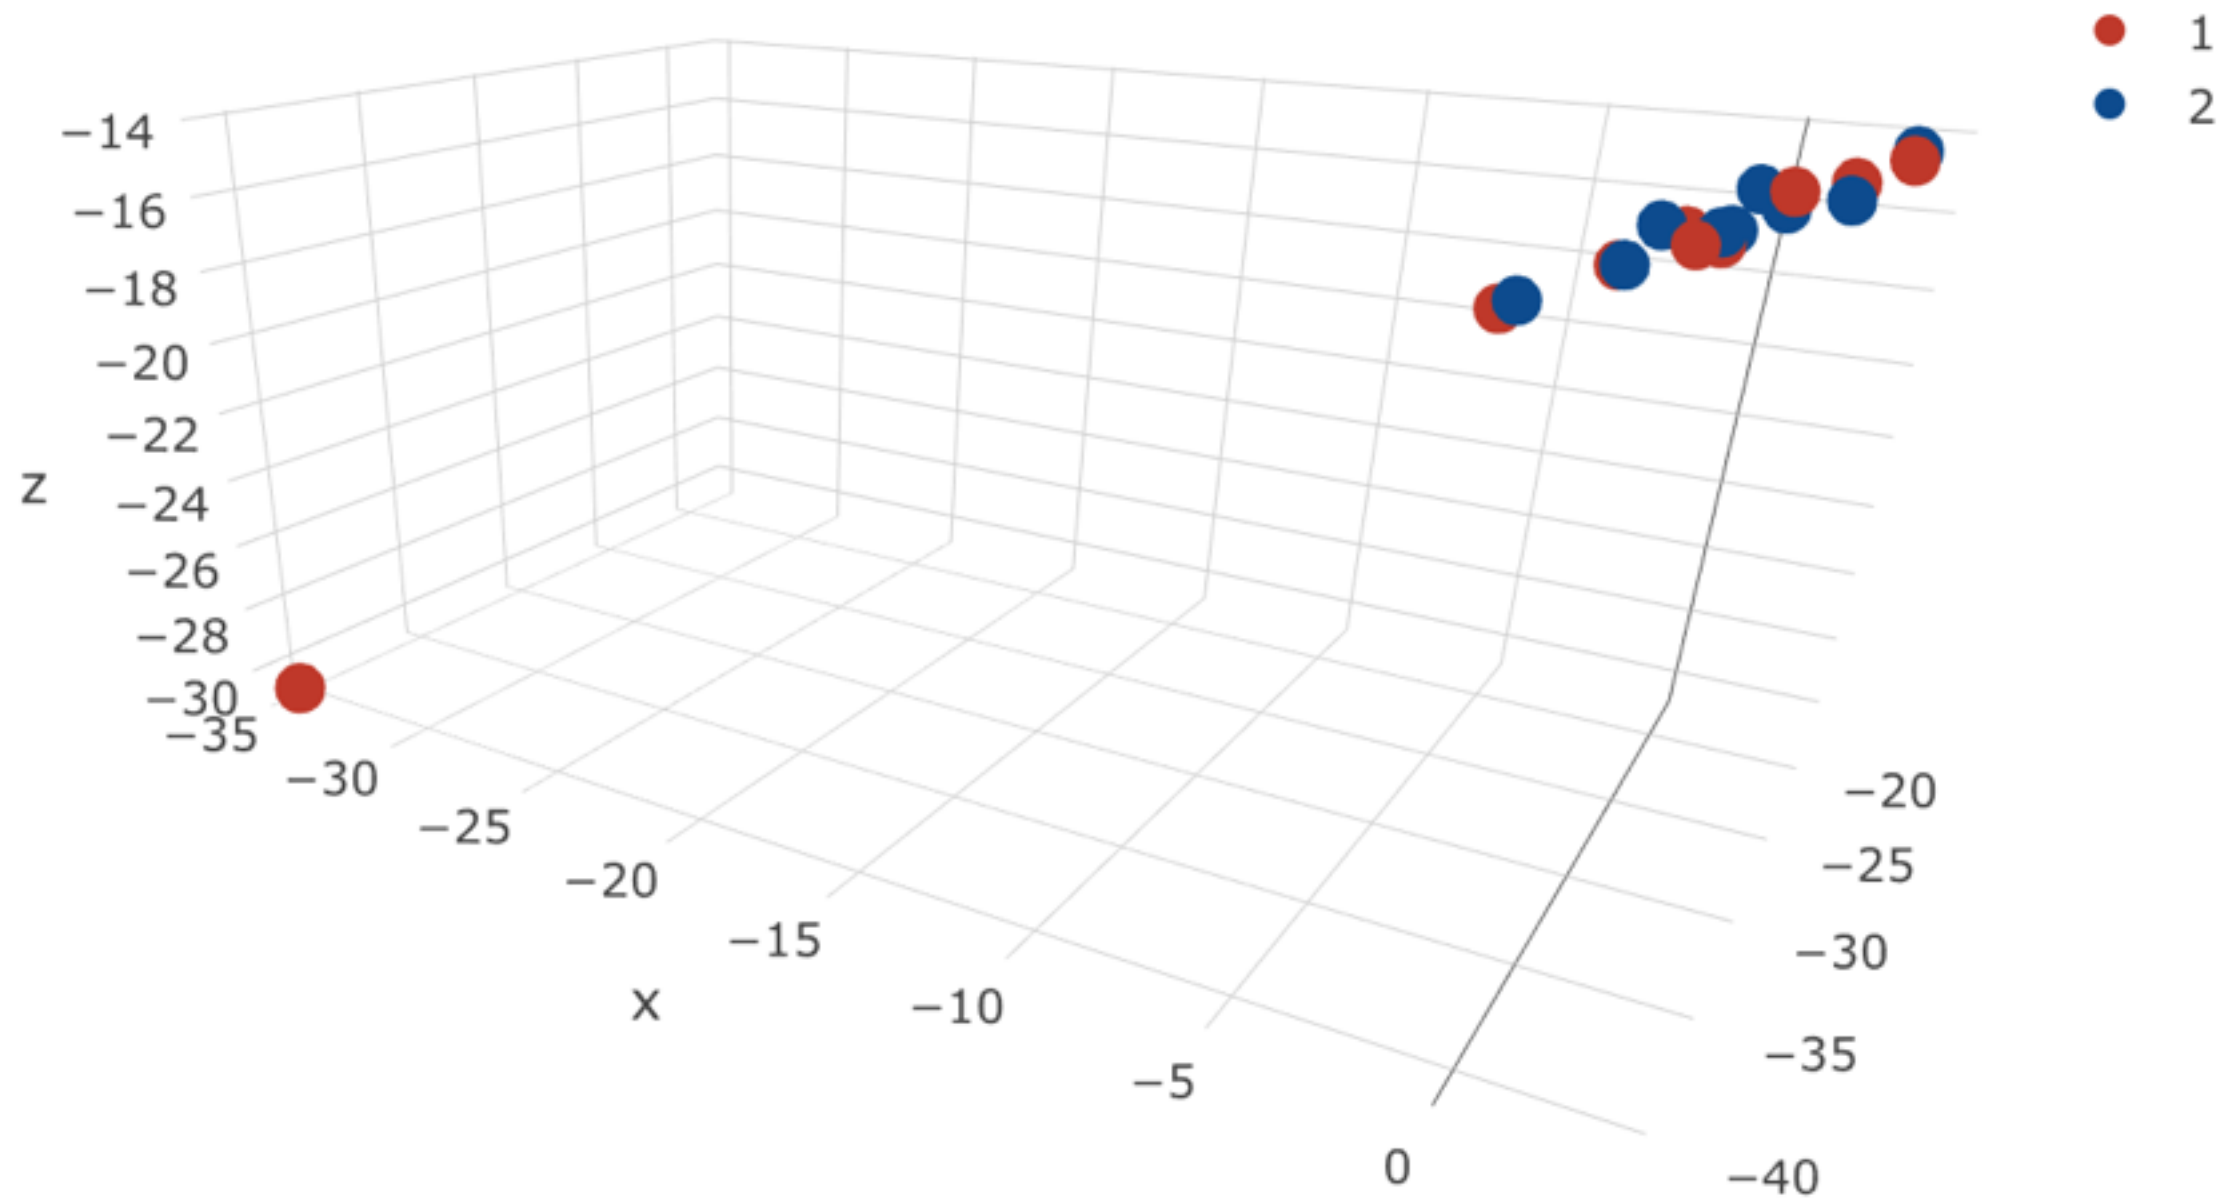

D_i: individual loadings over **genotypes**

LDA error: 0.278

D_i: individual loadings over **genders**

LDA error: 0.666
